# Mohammad Almasri

(970-592621821) / Palestine - Ramallah / mohammadmasri349@gmail.com / linkedin.com/in/mohammad-almasri-5b606525a / www.masri.life

**Professional Summary**

Information Technology graduate with 3+ years of progressive hands-on experience at Ooredoo Palestine, spanning full-stack development (MERN), technical support, data science/ML, and now automation & DevOps. Skilled in building AI-powered tools, automating internal processes with Python and Bash, and developing full-stack web and mobile applications. Completed an academic exchange at Mälardalen University (Sweden) and a Udacity Data Science program. Seeking roles at the intersection of software engineering, AI, and operations.

## Education:

- **Al-Quds University – Abu Dis – Palestine, Abu Dis** **Sep 2022 – Sep 2026**
  Bachelor of Information Technology

**Mälardalen University - Västerås, Sweden**
Computer Science Exchange Student ***Oct 2024 – Jan 2025***

## Experience:

- **Ooredoo Palestine - Ramallah, Palestine** **Jun 2023 – Present**
  **Position Name:** Trainee
  **Activities and Responsibilities:**

**Automation & DevOps Trainee** – Ooredoo Palestine (May 2026 – Present)
- Automating internal processes and operational tasks with Python and Bash
- Working with CI/CD pipelines, Git, and deployment tooling
- Learning infrastructure-as-code, containerization, and monitoring

**Data Science Trainee** – Ooredoo Palestine (Jun 2025 – May 2026)
- Trained ML models (classification, regression, clustering) with Pandas, Scikit-learn, TensorFlow, and Keras
- Applied NLP, prompt engineering, and LLM-based chatbot optimization for the Ooredoo HR Chatbot
- Built dashboards and integrated ML models into web applications; documented pipelines and metrics

**Help Desk & Technical Support Trainee** – Ooredoo Palestine (May 2024 – Jun 2025)
- Diagnosed and resolved issues with desktops, laptops, printers, and mobile devices
- Supported Windows/Linux, Microsoft 365, and enterprise software; managed accounts via Active Directory
- Assisted with patch management and network configuration; documented solutions in the knowledge base

**Full Stack Development Trainee** – Ooredoo Palestine (Jun 2023 – May 2024)
- Built responsive interfaces with React and React Native; developed RESTful APIs with Node.js and Express
- Designed and optimized MongoDB databases for structure and performance
- Worked in Agile teams with designers and product owners, using Git and CI/CD pipelines

**Buthor Company - Hebron, Palestine** **Dec 2022 – Feb 2023**
**Position Name:** Trainee
**Activities and Responsibilities:**

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript
- Implemented UI components with React and followed modern UX/UI best practices
- Collaborated with senior developers to translate designs into functional web pages

## Projects:

**Tadbeer** – Graduation Project
- AI-driven ticket management system built on the MERN stack with role-based workflows for employees, managers, and administrators
- Generative AI analyzes tickets to suggest priority levels and assist with solution guidance and summarization

**SKLR** – Mälardalen University
- Peer-to-peer skill-sharing platform built with Flutter and Node.js, featuring a time-banking system and reputation metrics

**UniConnect**
- Web-based appointment booking system for students and academic staff, built with React.js and MongoDB

### Certifications

- IBM Z Day 2025 – AI & Data (IBM)
- IBM Z Day 2025 – Security (IBM)
- Bug Bounty & Cybersecurity Bootcamp (SED – Society of Engineers & Developers, AQU)
- Software Engineering & Ethics of Coding – SED
- Use Canva to Create Desktop & Mobile-Friendly Web Pages – *Coursera*
- Create a No-Code Responsive Website with Webflow – *Coursera*
- Getting Started with Microsoft PowerPoint – *Coursera*
- Create a Resume and Cover Letter with Microsoft Word – *Coursera*

---

## Skills:

- Programming Languages: Python, JavaScript, Bash
- Web & Front-End Development: React, HTML, CSS, JavaScript
- Back-End & Full-Stack Development: Node.js, Express, MongoDB, REST APIs, MERN Stack
- Data Science & Artificial Intelligence: Pandas, Scikit-learn, TensorFlow, Keras, NLP
- Chatbots & Automation: LLM-based chatbots, prompt engineering, CI/CD automation
- Mobile Application Development: React Native, Flutter
- Tools & Software: Git, CI/CD pipelines, Active Directory, Microsoft 365
- Professional & Soft Skills :

- Problem Solving
- Communication
- Presentation Skills
- Teamwork
- Team Leadership
